

DynaSys Solutions Limited Has Earned the SAP on Microsoft Azure Advanced Specialization

[Hong Kong] – [23 Aug 2021] – DynaSys Solution (<https://www.dynasys.com.hk/>) today announced it has earned the SAP on Microsoft Azure advanced specialization, a validation of a services partner's deep knowledge, extensive experience, and proven success at implementing SAP solutions on Azure.

As mainstream support for the SAP ECC platform ends in 2027, and as core SAP products are being optimized for the SAP HANA database, many enterprises are looking for a partner with advanced skills to migrate and modernize their existing SAP environment in the cloud.

Ronnie Sung, Managing Director of DynaSys Solutions Limited commented, "DynaSys Solutions is proud to have earned the SAP on Microsoft Azure advanced specialization. Our dedicated professional team has successfully passed rigorous tests and met stringent criteria around customer success as well as staff skilling on both SAP and Azure technologies before earning the advanced specialization. It definitely reaffirms our technical capabilities in the Microsoft Partner Network program and validates our competencies to deliver best-in-class specialized services in complex solution areas with Azure."

Rodney Clark, Corporate Vice President, Global Partner Solutions, Channel Sales and Channel Chief at Microsoft added, "The SAP on Microsoft Azure advanced specialization highlights the partners who can be viewed as most capable when it comes to migrating enterprise SAP applications over to Azure. DynaSys clearly demonstrated that they have both the skills and the experience to offer clients a comprehensive and professional SAP to cloud managed service."
